

JAMES CROPPER

ESTABLISHED 1845

ENERGY POLICY

James Cropper PLC is a manufacturer of speciality coloured paper and board products, non-woven fabrics and the design, manufacture and supply of coloured thermoformed pulp products.

The following statements summarise the Group's position regarding the management and use of energy throughout its operations.

- We recognise that our operations are energy-intensive in nature, form a key constituent of our business, and therefore requires careful management to minimise the use of energy resources. The company is committed to continual improvement of Energy performance and the EnMS.
- The Company shall, through the application of suitable procedures and management activity, manage a continual improvement cycle (Plan, Do, Check, Act) in regard to its use of energy in its various forms, from its arrival at site, to conversion, through to consumption.
- The Company shall ensure the availability of information regarding its use of energy and the necessary resources to achieve its objectives and targets.
- The Company shall maintain up-to-date knowledge of its legal and other regulatory requirements pertaining to its energy use, consumption, and efficiency, and shall comply with those requirements.
- The Company shall, through its management processes, provide and maintain the framework for setting and reviewing energy objectives and targets.
- The Company shall initiate and maintain procedures to implement the purchase of energy-efficient products and services, and design for energy performance improvement.
- We shall continue to meet the requirements of the ISO 50001:2018 Energy Management Standard and maintain our certification.
- This Policy is documented and promoted by the Company's Senior Management.
- We will make our policy publicly available and maintain energy information on the Company Website (www.jamescropper.com).
